ARROYAVE H.
LITIGIO

A family name. A clearer future.

Brand identity & digital foundations

A practical system for the public website, client platform, and everyday communications.

DESIGN PROPOSAL / EDITION 01

One identity. A complete starting point.

Use this manual as the visual authority. Use the included code and artwork as the working foundation.

01

Read the system

Start with the logo, palette and type rules. They explain the decisions behind the interface.

02

Open the preview

Open Arroyave-Web-Platform-Preview.html. Switch between Website, Portal and Components.

03

Build from the assets

Import SVGs into your design tool, install the fonts, and use the CSS and JSON tokens.

Established identity

Name: Arroyave H. Litigio
Descriptor: Asesoría y representación judicial
Family company; navy, gold, A and gavel heritage.

Proposed design system

Refined artwork, warmer palette, typography, voice, page structure and client workflows. Example copy and data require owner review before launch.

Keep the recognition. Simplify the expression.

ORIGINAL REFERENCE

REFINED PRODUCTION ARTWORK

ARROYAVE H.
LITIGIO

The name, navy-and-gold association, and A/gavel concept remain. The new geometry removes the plinth, faceted background, ornamental border and thin rules.

Claridad. Criterio. Cercanía.

The design should feel considered, understandable and personal. These are proposed brand principles.

Claridad

CLARITY

Explain the situation in direct language. Give each page one clear priority.

Product cue: status + next action.

Criterio

JUDGMENT

Use measured words, deliberate hierarchy and evidence the firm can support.

Product cue: separate confirmed and pending.

Cercanía

CLOSENESS

Offer a respectful route to the team. Let the family name lead the identity.

Product cue: make responsibility visible.

Clear communication is a design intention, not a promise of a legal outcome.

The name leads. The symbol supports.

01 A with a judicial cue

A confident serif silhouette retains the family initial. The diagonal gavel becomes one restrained gesture.

02 Editorial wordmark

Cormorant Garamond adds character and continuity. Use the supplied outlines, not retyped approximations.

03 Digital signature

The tracked LITIGIO subline separates the service identity from the family name.

Choose the right lockup for the space.

PRIMARY / HEADERS & DOCUMENTS

REVERSED / DARK SURFACES

STACKED / COVERS

MONOGRAM

MICRO ICON

Give the identity room to breathe.

x

x = 1/4 OF VISIBLE SYMBOL HEIGHT

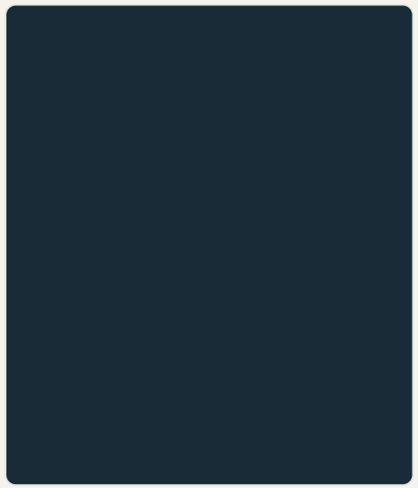

Keep at least x around the visible artwork. File padding is not always sufficient; add layout space as needed. Never stretch, rotate, recolor individual letters, add effects, or place the logo on busy imagery.

Version	Screen / print
Primary	280 px / 70 mm wide
Compact	200 px / 50 mm wide
Stacked	320 px / 70 mm wide
With descriptor	640 px / 125 mm wide
A/gavel mark	40 px / 10 mm wide
Micro icon	16-32 px; digital only

Use compact artwork for narrow headers. The micro A removes the gavel detail at favicon sizes. For smaller use, show the name separately in accessible text.

Deep ink. Warm brass. Quiet space.

The digital master is sRGB. Use color to organize attention; keep most reading surfaces light.

INK

#182B36

RGB 24 / 43 / 54

CMYK* 56 / 20 / 0 / 79

BRASS

#B69A63

RGB 182 / 154 / 99

CMYK* 0 / 15 / 46 / 29

IVORY

#F6F3EC

RGB 246 / 243 / 236

CMYK* 0 / 1 / 4 / 4

DARK BRASS

#806438

RGB 128 / 100 / 56

CMYK* 0 / 22 / 56 / 50

WHITE

#FFFFFF

RGB 255 / 255 / 255

CMYK* 0 / 0 / 0 / 0

*CMYK values are mathematical starting points, not profile-matched print specifications. Have the printer convert for the intended paper/profile and proof the result. No Pantone equivalence is assigned.

Use gold as an accent on light surfaces.

Contrast values below were calculated from the exact sRGB tokens. This is a palette check, not full WCAG certification.

Foreground / background	Ratio	Use
Ink / ivory	13.18:1	Body, headings and navigation
Muted / ivory	5.78:1	Secondary text
Dark brass / ivory	4.99:1	Small accent text
Brass / ink	5.42:1	Accent text on dark
White / teal	7.35:1	Alternative action
Brass / ivory	2.43:1	Decoration or logo only
Line / white	1.35:1	Decorative dividers only

Consultar mi asunto

Información importante

Normal text: at least 4.5:1. Large text: at least 3:1. Essential control boundaries and states: at least 3:1 against adjacent colors. [1, 2]

Editorial character. Digital clarity.

Aa

Cormorant Garamond

Display 500; emphasis 600.
Use for brand headlines and major editorial titles. Avoid it for dense tables, field labels or small metadata.

Manrope

UI / body 400, 500, 600, 700

Role	Screen size / leading	Weight
Display	52-104 px / 1.02	500
H1	44-72 px / 1.12	500
H2	36-56 px / 1.12	500
H3 / card title	24 px / 1.25	600
Body	16 px / 1.65	400
UI / label	14-16 px / 1.4	500-600
Supporting text	14 px / 1.5	400-500

Use sentence case in UI. Keep accents in Spanish capitals. Text-heavy layouts: limit reading lines to about 65 characters. Fonts and licenses are included. [4, 5]

Structure creates calm.

A shared spacing scale and restrained corners connect the public site and private workspace.

12-column planning grid / max content width 1280 px / 24 px desktop gutter

Responsive planning

Desktop: 12 columns. Tablet: 8. Mobile: 4. Use 24 px gutters on large screens and 16 px on small screens.

Space and shape

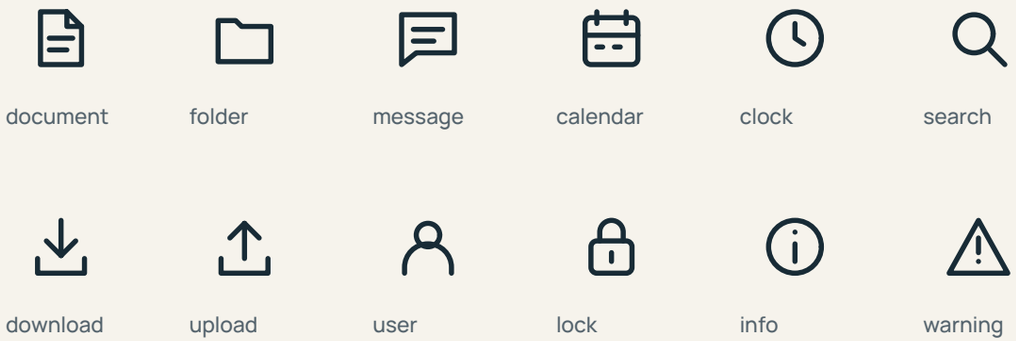

Base unit: 4 px. Main steps: 8, 12, 16, 24, 32, 48, 64, 96. Corners: 4, 8 and 12 px. Pills only for compact status labels.

Interface rhythm

48 px standard controls; 44 px target default. Keep body text at 16 px. Let data reflow into labeled cards on mobile.

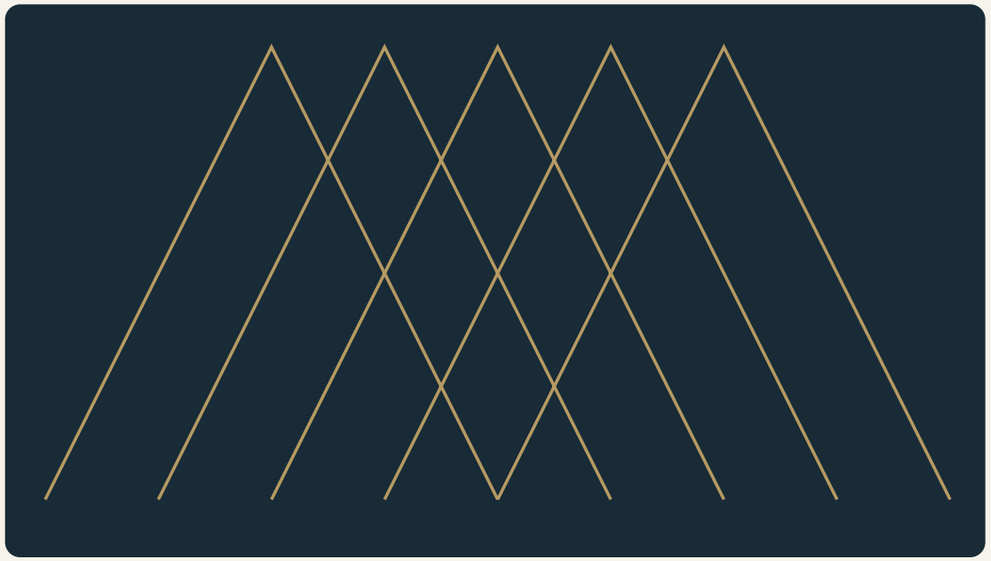

The column grid is design guidance. The supplied preview uses responsive CSS layouts; breakpoint behavior should follow content rather than a device name.

A small, consistent visual vocabulary.

20 original line icons. Use a 24 px canvas and 1.75 px strokes. Pair unfamiliar icons with a label; decorative icons receive an empty accessible name.

Future photography: real team, actual spaces and thoughtful working details. Obtain permission and avoid exposing client information. No stock image is presented as the firm.

The ascending line

Use the A-inspired motif in quiet cover areas. Keep it away from reading text, tables and form fields. Use the clean logo without a pattern beneath it.

Speak clearly. Sound human.

Claridad jurídica.
Acompañamiento cercano.

PROPOSED PUBLIC HEADLINE

Use	Avoid
Solicitar una consulta	Resuelva su problema hoy mismo
Necesitamos un documento adicional para continuar.	Su solicitud está incompleta.
Documento recibido.	Documento aprobado. (unless reviewed)
Le explicamos el siguiente paso.	Garantizamos el resultado.

Use usted consistently. Prefer direct verbs and sentence case. Keep the inherited descriptor as the default identity line. Do not invent specialties, awards, dates, credentials or results.

Make the first step understandable.

Section	Purpose	Primary content
Inicio	Explain the offer	Name, descriptor, proposed headline, consultation CTA
El despacho	Introduce the people	Owner-approved family story and team information
Acompañamiento	Explain how to begin	Confirmed services and a clear engagement process
Contacto	Open a conversation	Verified contact routes and short intake form
Acceso de clientes	Enter the private workspace	Separate authenticated client experience

Suggested home sequence

Hero > firm introduction > accompaniment > process > contact. Keep a single main CTA visible.

Information to supply

Approved services, team biographies, address, contact routes, hours and relevant policy text.

An editorial public presence.

Actual screenshot of the included local design preview. Spanish copy is proposed for review.

One primary invitation

Solicitar una consulta introduces a clear, measured next step.

Family identity first

The name is prominent. No fabricated statistics, awards or testimonials are used.

Quiet brand expression

Ivory reading areas and restrained architectural linework support the content.

Keep the hierarchy on a small screen.

Compact logo

The narrow-header asset increases the size of the LITIGIO subline relative to the name.

Readable type

Use the same fonts with fluid headline sizing. Maintain 16 px body text and comfortable line height.

Real controls

Keep menu, buttons and fields easy to reach. The default target size is at least 44 px.

Mobile priorities

1. Who is the firm?
2. What can I ask about?
3. What happens next?
4. How do I contact the team?
5. Where do existing clients enter?

Put the next action ahead of decoration.

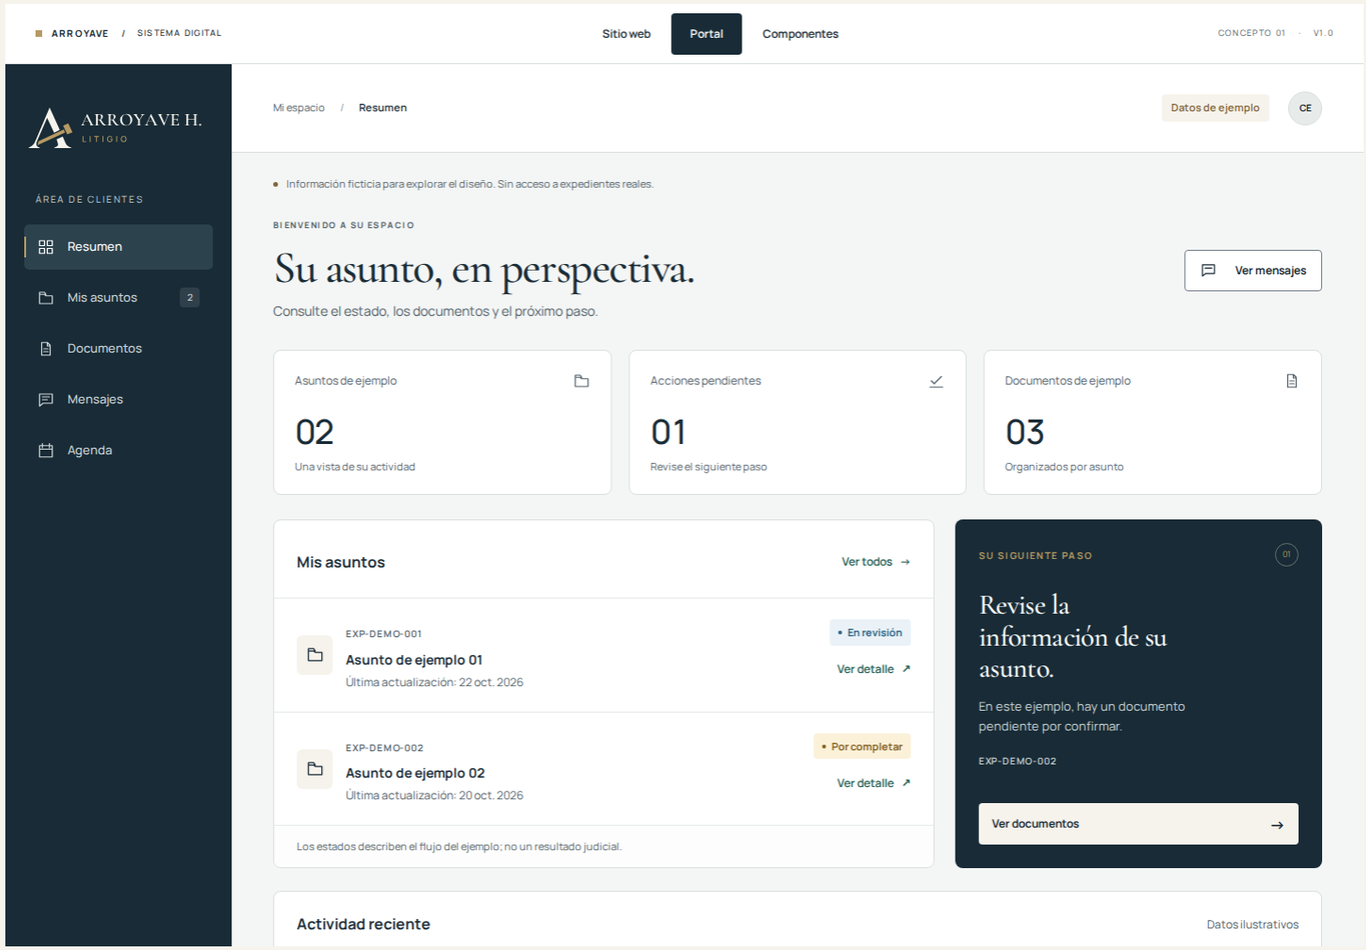

The platform is a proposed client workspace. Internal service status must stay distinct from official procedural status.

Area	Client question	Useful content
Resumen	What should I do now?	Next action, active matters and recent updates
Mis asuntos	What is happening?	Internal reference, status, responsible team and next step
Documentos	What is available or needed?	Matter, filename, received/review status and timestamp
Mensajes	Who can I ask?	Contextual conversation and a clear recipient
Agenda / future module	Which date matters?	Verified event, source, timezone and responsible person

A document upload is not a legal approval. An internal task deadline is not automatically a court deadline. An internal reference is not a radicado. Use distinct labels and verified sources.

A clear workspace for ongoing matters.

Actual screenshot of the design preview. All matters, documents, messages and dates are synthetic examples.

Action first

The next requested step receives the strongest emphasis.

Status with meaning

Words accompany color. A status explains a real service state.

Predictable navigation

A stable sidebar connects matters, documents and messages.

Preserve context when the layout changes.

Reflow data

Turn wide matter rows into labeled cards. Never rely on column position alone to explain a value.

Keep actions explicit

Prefer Revisar solicitud or Ver documento over a generic icon-only button.

Keep context visible

Carry the matter name and reference into documents, messages and future actions.

The client should know

What changed?

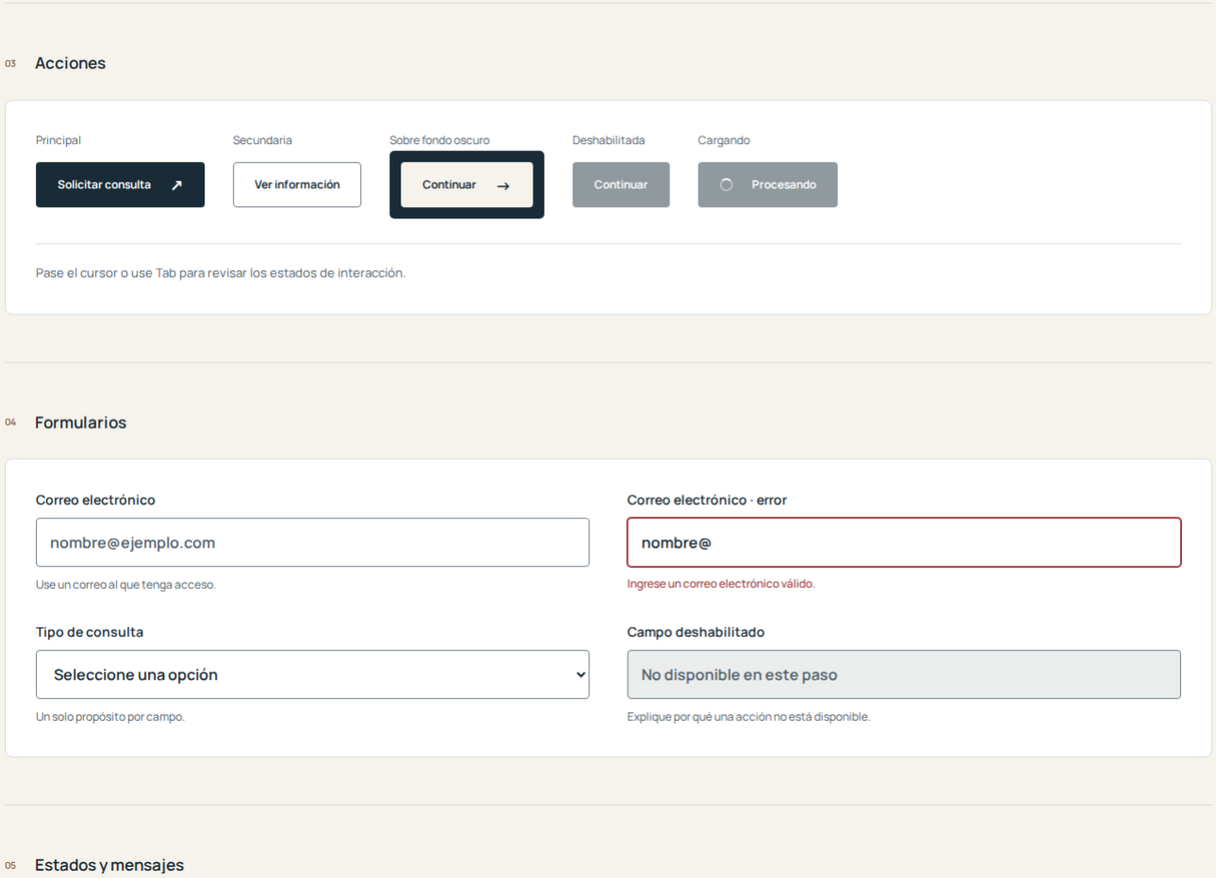

What is confirmed?

What do I need to do?

Who is responsible?

When was this updated?

One component language across both surfaces.

Buttons

Primary ink, outlined secondary, text link and disabled. Label the action with a verb.

Forms

Persistent label, helper, required state, visible focus and nearby error. Never use color alone.

Feedback

Show loading, empty, failure and confirmed completion states deliberately.

Use a small set of meaningful states.

State	Meaning	Visual role
En revisión	The team is reviewing information.	Info text #285F83 / #EAF2F8
Por completar	A specific client action is needed.	Warning #805B16 / #FBF1D9
Disponible	A document can be consulted; not approval.	Teal #1D6055 / #EAF3ED
Requiere atención	An item needs review or correction.	Danger #A13C3C / #FBECEC
Error	An action failed; offer a recovery path.	Danger #A13C3C / #FBECEC

Empty state

Aún no hay asuntos disponibles. Cuando el equipo comparta un asunto, aparecerá aquí.

Honest confirmation

Say Documento recibido only after successful storage. Approval requires its own verified event.

Design for clarity in every interaction.

Contrast

Use the tested pairs. Essential control borders use #73808A or a darker token; pale lines are decorative. [1, 2]

Keyboard

Every actionable element is reachable. Use a visible focus indicator and a logical order. Restore focus after dialogs. [3]

Targets

44 px is this system's default target size. WCAG 2.2 AA sets a 24 px minimum with exceptions; these are different rules. [6]

Reading

Use semantic headings, labeled fields, sentence case and clear language. Avoid text embedded in pictures except brand artwork.

Motion & feedback

Respect reduced-motion preferences. Announce important status changes; avoid feedback that disappears before it can be read.

Verification

Test keyboard use, screen reader names, zoom/reflow, contrast, errors and mobile behavior on the actual finished product.

Carry the same identity beyond the screen.

BUSINESS CARD

Print templates are trim artwork. Confirm size, bleed, stock, color profile and proof with your printer.

A4 LETTERHEAD

Editable SVG fronts/backs, letterhead, social avatar, social sharing image and an HTML email signature are included. Replace bracketed contact fields.

Know which file to use.

Folder	Contains	Use
01-brand-manual	PDF, overview SVG and PNG	Understand and share the system
02-logos	16 SVGs, transparent PNGs, 3 vector PDFs	Use SVG for web/design; PNG for raster placement
03-digital-assets	Icons, favicons, social and stationery	Start interface and communication design
04-design-system	CSS, JSON, GPL palette, contrast report	Create styles and connect implementation
05-web-platform-preview	HTML, CSS, JavaScript and screenshots	Inspect desktop/mobile UI and component behavior
06-fonts	TTF, WOFF2 and OFL licenses	Install fonts and self-host the webfonts
07-guides	Voice, product brief and developer handoff	Turn brand decisions into requirements
08-source	Editable typography, builders and references	Revise and regenerate artwork

The top-level standalone HTML is the quickest preview. SVGs import into Figma, Illustrator and other vector editors; no native Figma project is included.

A practical handoff, with clear ownership.

01

Designer

Install the fonts. Import outlined SVG masters. Create color/type styles from tokens. Design the remaining screens and exceptional states.

02

Developer

Use shared semantic tokens and accessible components. Replace demo logic with real authenticated services and server-side validation.

03

Firm owner

Approve the name treatment, proposed copy, services, team details, contact routes and the actual client workflow.

What the preview does

Local navigation, tabs, filters, dialogs and illustrative form validation. It can be opened without a build process.

What the implementation still needs

Authentication; access by client and matter; secure file handling; real messages; server-side records, sessions and audit history. Demo actions do not send or store data.

Keep the system coherent as it grows.

This is version 1.0 of a proposed identity system based on the supplied family-company logo. The vector artwork controls geometry and color. The generated bitmap is retained as an exploration reference, not the production master.

[6] W3C: Target Size (Minimum)
https://www.w3.org/WAI/WCAG22/Understanding/target-size-minimum.html

Version discipline

Keep one approved master.

Change tokens centrally.

Record new component states.

Preserve font licenses.

Review visual changes together.

Font files and license texts were retrieved on 22 Oct 2026. Public-source references are included for implementation guidance. There are no verified company claims beyond the user brief and supplied identity.
